TSC Operation Highlights

TSC's Systems Development and Production Division provides products and services in the areas of radar, communication systems, sensors, antennas and other electronics systems to the missile, radar/sensor system, communications, control systems, data acquisition, and signal processing markets. The company has developed products ranging from chip-level, application-specific, integrated circuits (ASIC) to complete, turnkey radar and communication systems. TSC has established a state-of-the-art hardware capability that is well respected by customers in Government and industry. TSC also provides full spectrum systems engineering support including theoretical analysis, requirements generation, interface control, and test planning/execution/data analysis.

Job Description:

TSC's System Development & Production Division is currently looking to hire an experienced Program Manager with an educational and/or industry focus in the design, development and production of military electronics and RF/microwave systems including but not limited to radars/sensors, missile seekers, communications systems and Digital Signal Processing (DSP) subsystems.

Responsibilities:

- Program management of all assigned programs, including team resource management.
- Financial, schedule and deliverable management of all assigned programs.
- Frequent discussions with existing customers to identify technical/program needs.
- Cross functional leadership to ensure designs meet customer requirements, and hardware delivery dates are met.
- Generation of technical presentations and white papers in support of in-house hardware development activities and proposals.
- Supporting hardware demonstrations, technical discussions and Q&A with customers.
- Capture management of new opportunities with existing customers.
- Generation of new programs based on conceptual solutions to customer identified problems.
- Support of Operation business development efforts to expand into new markets/customers.

Qualifications

Required Qualifications:

- B.S. in Electrical Engineering
- 10 years of experience in industry including military hardware development activities
- Proven history of successfully managing hardware deliverable programs and interfacing with all levels of customer organizations
- Experience in developing new programs and generating proposal responses for Requests for Information (RFI) and Requests for Quote/Proposal (RFQ/RFP) for large procurements

-Strong technical and managerial background with experience in one (or more) of the following areas:

- Military Electronics System Development and Delivery
- Radar & Communications Digital Signal Processing Systems
- Military Hardware Production & Quality Control
- Radar & Communication System/Subsystem Design, Analysis, Integration and/or Field Testing
- Military Electronics System Manufacturing & Integration

Preferred Qualifications:

- Experience with RF, Radar, or Rocket/Missile systems/subsystems
- Excellent organizational skills, ability to prioritize work and maximize productivity
- Self-motivated and free-thinking individual capable of independent technical discussion, program leadership and significant customer interaction.

U.S. Citizenship Required: Yes
