

INFORMATION SYSTEM SECURITY MANAGER (ISSM)

TSC is looking for an **Information System Security Manager (ISSM)** to be responsible for implementing, maintaining, reviewing, and enforcing security policies on various classified information systems (IS). The ISSM will serve adjacent to/support the Program Security Officer (PSO/CPSO) in the enforcement of DoD/Risk Management Framework (RMF) security policies, and ensuring that existing and new ISs are fully compliant. Additionally, they will be expected to support technical staff and management in the capacity of a systems administrator periodically, with significant overlap between these two roles. The ISSM will be responsible for regular periodic IS audits, proper IS management in accordance with the in place Operating Procedures and other security directives, and training technical staff & management on proper security procedures.

Requirements:

- At least 5 years of experience in Information Security and/or Systems Administration for Windows systems
- US Citizen with an active Top Secret Clearance
 - Experience with SAP/SCI security requirements preferred
- Current Security+ Certification
 - Comparable DoD 8570 IAT Level II or IAM Level I certification acceptable
 - CISSP/CASP certification is a plus
- Bachelor's degree in Computer Science, or in comparable field
- Knowledgeable about Risk Management Framework
 - Direct experience with RMF a plus
- Experience in the successful execution of certification and accreditation for Information Systems
- Experience with classified intra-net connections desirable (eg: CNET, SIPRNET)
- Experience with scanning/auditing tools such as SCAP
- Experience building, maintaining, and troubleshooting servers and computer networks
- Strong written and verbal communication skills
- Ability to independently troubleshoot and resolve technical problems for ISs

Company Overview: TSC is a **high technology company** primarily engaged in providing engineering consulting services and specialized products to the U.S. Government and industry. Consulting and research services span the systems life cycle from advanced concept development through logistics support. Our specialized products include electronic components for microwave and digital processing systems; prototype demonstration systems; and computer software for radar siting, and sensor simulations.
